INI account managed/entry businesses sell outside NI

All sectors

67 individual markets plus grouped regions

Coverage

GB

Rol

EU 27 (excl Rol) RoW

Notes:

- UK Regional Trade Statistics (RTS) records exports based on the country of ultimate destination however there is an unquantified issue where exports may be assigned to point of dispatch/arrival rather than final country to which goods are being sold i.e. 'The Rotterdam effect'.
- UK RTS exports are assigned to sectors using the Standard International Trade Classification (SITC) system, NISRA uses
 the Standard Industry Classification 2007 (SIC 07) and Invest NI uses both SIC 07 and an organisational reporting
 system: SITC and SIC are not comparable.
- · Invest NI KPIs allow access to individual business data (for operational purposes only) and can also be used for sub-regional reporting.

External Sales = sales outside of NI. **Exports** = sales outside of UK.
