

Quarterly Employment in NI

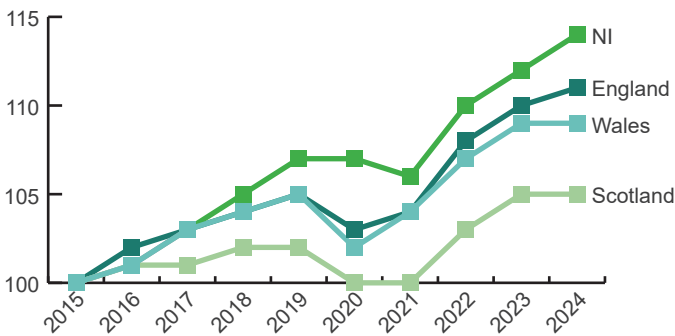

June 2024

Source: Quarterly Employment Survey, NISRA (September 2024)

The Quarterly Employment Survey is used to calculate employee jobs estimates. It has a sample size of approximately 6,000 and covers all employers with 25 or more employees, all public sector employers, all businesses with more than one industry activity and a representative sample of smaller firms. The survey measures the number of jobs, not the number of people with a job. A person can have more than one job and some jobs may be shared by more than one person. All figures stated are seasonally adjusted and figures are rounded to the nearest 10 so they may not sum due to this rounding.

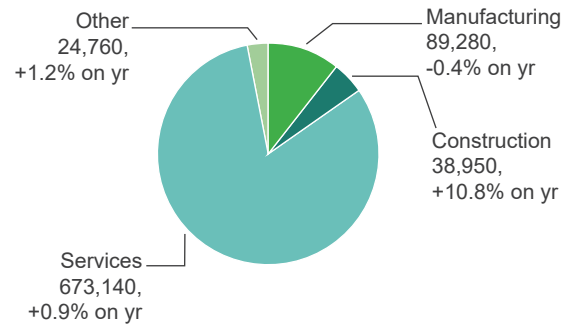

Index of Employee Jobs by Region
June 2015 to June 2024

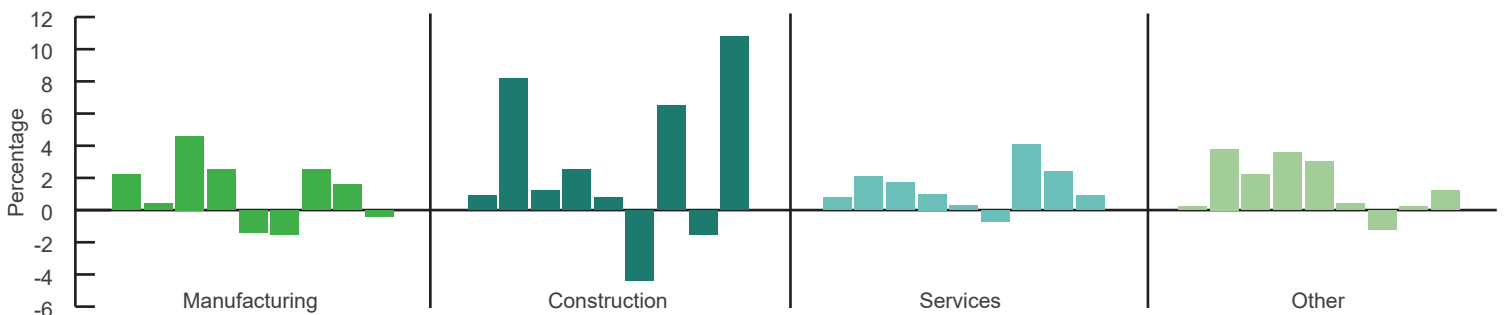

NOTE: The index above compares the change in employee jobs for the 4 UK countries between 2015 and 2024. For example in 2024 there were 14% more jobs in NI than in 2015
